Spectrum Club,
College Of Engineering and Technology
Bhubaneswar
www.spectrumcet.com

Dear Participant,

In this internship drive, you will have to work in three stages. Stage 0 and Stage 1 will merely be easy tasks whereas Stage 2 will be an implementation of Stage 0 and Stage 1 in a project. Each stage will have its own time limit. Go ahead, check the technology stack, learn more and implement. Wish you luck and hope you ~~build~~ design yourwe best website.

<!- - Building a website is easy, designing one takes the skill - - >

Welcome to the **Stage 1**.
You are provided with following **Task 1** and have to submit it by given date.

TASK 1:

Technology Stack to be used:

- HTML   -PHP   -MySQL

Tasks:

1. section.php

a. In the section.php page which you created in the previous task, you displayed the table containing the details such as student name and their corresponding registration no.

b. Now you have to add a date input field above the table where the user can input the date on which he/she is going to take the attendance of the class.

c. Once you input the date then a column with the date as the column name should get added to the table and each row should have a present and absent button in it.

2. Operation of the present and absent button

a. For carrying out the operation, the present and absent buttons are the key here. When the user clicks the present button for a particular student then letter 'P' is entered

in the today's date column of the class table. And when the late button is pressed then letter 'A' is entered into it.

The above tasks are to be submitted by:

Uploading to your GITHUB account and submit the link.

Or

Adding the files to Google drive and submit the public link.

LAST DATE OF SUBMISSION:

Warm regards,

SPECTRUM, CET-B
